

Buy what you need today

Expand to what you want tomorrow

The Challenge

How do you protect your investment for future changes in process demands?

The Solution

CM44x Platform – panel, field and samplers

- **Modular, flexible and upgradeable**
Plug-and-play modules and digital sensors simplify future expansion to meet new process demands.
- **Memosens technology**
Common hardware and software in all transmitters and samplers ensures simplified commissioning, operation and maintenance.
