

Technology Days 2018

Oil & Gas Industry

Dates and Locations

May 29, 2018

Southern Alberta Institute of Technology (S.A.I.T)
Room: V202 The Symposium
in the Campus Centre
1301 16 Ave N.W
Calgary, AB T2M 0L4

Registration

eventloom.com/event/home/CalgaryTechDaySAIT2018

May 31, 2018

Endress+Hauser
9045 22 Ave S.W
Edmonton, AB T6X 0J9

Registration

eventloom.com/event/home/EdmontonPTUTechDay2018

Agenda

8:30 a.m. Registration & Breakfast

9:00 a.m.–2:30 p.m.

Complimentary Lunch

Details and registration

Go with the flow – How to verify, prove and calibrate Coriolis technology

SPEAKER: Kyle Kergen

Accuracy is critical in process automation, potentially affecting quality, consistency, efficiency and even safety. Gain a thorough understanding of flowmeter calibration, verification and proof testing as it relates to your operations. Explore industry standards and practices to ensure regulatory conformance for your business.

The evolution of the Coriolis meter

SPEAKER: Kyle Kergen

The Coriolis meter has come to dominate many discussions in measurement and is arguably the most accurate flowmeter on the market. Take a closer look at how this meter has evolved and what the future looks like, now. Learn about the new Proline series, unique built-in Heartbeat diagnostics, new entrained gas and gas void fraction measurement capabilities, viscosity measurement, water cut measurement with just a Coriolis meter, and more.

Liquid analysis for industrial applications

SPEAKER: Duncan Hoyle

Water (and steam) is a key input into industrial processes as well as a valuable resource. As regulators take a closer look at water quality issues, end users are leveraging new technologies to meet regulations but also to optimize operations. In this talk, we will discuss the use of intelligent communications for support in water analytics, as well as solutions that assist with equipment lifespan management and cost reduction.

Storing value – State-of-the-art tank gauging solutions for controlling and monitoring of the inventory of your tank

SPEAKER: Dirk Steyn

Your tanks contain valuable product which requires accurate assessments of its quantity and value. This information is crucial to the efficiency of your operations and for commercial decisions that impact your bottom line. Let us show you how tank gauging solutions from Endress+Hauser will help you reduce inventory costs, increase productivity, maintain uptime and increase safety.
