

Endress+Hauser award winning device configuration tablets made to order for general purpose and hazardous zones

BURLINGTON, ON, July 2019 – Endress+Hauser is offering two universal, device configuration tablet PCs that provide especially fast, efficient one-click mobile device configuration and plant asset management in hazardous environments. With these robust, touch-enabled Field Xpert tablet PCs – model [SMT77](#) for Cl. 1 Div. 1 and [SMT70](#) for Cl. 1 Div. 2 – maintenance staff can manage virtually all digitally communicating Endress+Hauser and other field instruments throughout their entire life cycle. Both can be utilized just as effectively in non-hazardous parts of the same facilities.

The [SMT70](#) won a Product of the Year award for 2018, as voted by readers of *Plant Engineering*. These tablets are slim, lightweight for such reinforced construction, and intuitive to use. They are ready to go right out of the box – providing complete solutions to manage field instruments in a time- and cost-saving manner. Fast connections are assured via the tablets' built-in automated hardware detection capability. Both models have installed device configuration software in 20 languages; that includes NAMUR NE 107 instrument diagnosis. Extensive, pre-installed driver libraries stored in both tablets cover all important industrial protocols and offer access to the Industrial Internet of Things as well as to device information and documentation. The Field Xpert tablet automatically updates all DTMs and software regularly to ensure maintenance teams have ultimate connectivity when it counts.

Both models also support multiple communication technologies including [HART](#), [Profibus DP/PA](#), [Foundation Fieldbus](#), Modbus and [EtherNET/IP](#). Device connectivity may be achieved point-to-point, over digital networks, or via marshalling cabinets, remote I/Os and gateways, making the Field Xpert a versatile means to perform device configuration.

The 1.2 kg [SMT70](#) boasts a large 11.6" display and a battery runtime of up to 14 hours, while the 2.3 kg [SMT70](#) has a 10.1" display and a battery runtime of up to five hours.

About Endress+Hauser

Endress+Hauser is a global leader in measurement instrumentation, services and solutions for industrial process engineering. Our products – sensors, instruments, systems and services for level, flow, pressure and temperature measurement as well as analytics and data acquisition – set standards in quality and technology. The company further supports its customers with automation engineering, logistics and IT services and solutions. Founded in 1953 by Georg H. Endress and Ludwig Hauser, the Endress+Hauser Group has been solely owned by the Endress family since 1975. Today, the Group is managed and coordinated by a holding company based in Reinach, Switzerland, employing close to 14,000 personnel across the globe. In 2018, the Group generated net sales of over 2.4 billion euros. Endress+Hauser's production centres in 12 countries meet customers' needs and requirements quickly and effectively, while our dedicated sales centres and strong partner network guarantee competent worldwide support.

Endress+Hauser's robust, touch-enabled Field Xpert tablet PC (here: model SMT70 for Cl. 1 Div. 2) allows maintenance staff to manage virtually all digitally communicating E+H and other field instruments.
