

Endress+Hauser's Waterpilot FMX11 is the hydrostatic level probe of choice for freshwater applications

Burlington, ON – With its Waterpilot FMX11, Endress+Hauser is building on the proven benefits of hydrostatic level measurement of freshwater sources in the environmental industry. Hydrostatic level measurement is particularly simple to install and maintain. The FMX11 offers simplicity of specification, purchase and installation as well as high accuracy (up to $\pm 0.35\%$) and reliability at an attractive price point. Its robust construction assures a long-service life.

The FMX11 is well-suited for freshwater applications such as well, storage tanks, lakes and rivers. It can perform surface monitoring in rivers and lakes as well as level monitoring for drinking water production, for example in water towers, dams and gauging stations. Its compact size (22mm diameter) makes it an excellent fit for applications in bore holes and small diameter stilling wells.

With drinking water certificates such as NSF-61, ACS, KTW and DVGW, the FMX11 meets regional regulatory requirements as well. The 4 to 20mA output makes the FMX11 easy to integrate into new or existing systems. All that's required is to wire it into I/O and set the required span in the user's control system. It can be ordered with flexible measuring ranges and cable lengths up to 30 m.

About Endress+Hauser Canada

Endress+Hauser is a global leader in measurement instrumentation, services and solutions for industrial process engineering. Endress+Hauser provides sensors, instruments, systems and services for level, flow, pressure and temperature measurement as well as analytics and data acquisition. We work closely with the chemical, petrochemical, food & beverage, oil & gas, water & wastewater, power & energy, life science, primaries & metal, renewable energies, pulp & paper and shipbuilding industries. Endress+Hauser supports its customers in optimizing their processes in terms of reliability, safety, economic efficiency and environmental impact. The Group employs just over 14,000 personnel worldwide and generated consolidated sales of just under 2.6 billion euros in 2020.
